

Grayson Mortar Tray

Environmentally friendly recycled aluminium mortar spot board

Grayson Eco-Spot Boards are an environmentally friendly alternative to timber and plastic (ABS) boards. They are produced from recycled aluminium and at the end of their serviceable life, can be completely recycled again by placing them in the site's metal waste skip.

The future is GREEN

- > Made from 100% recycled aluminium
- > Easy to clean and fully reusable
- > 100% recyclable
- > Developed and manufactured here in the UK

A simple concept, re-imagined

- No sharp edges or corners means no splinters
- Aluminium material doesn't suck water from mortar
- Raised edges for mortar retention
- Integrated carry handle and storage hook for ease
- Non-combustible and shatterproof

Additional Benefits:

- Made from recycled aluminium
- Can be easily recycled after service life
- Zero water absorption keeps mortar workable for longer
- Strong yet lightweight
- Highly visible
- Incorporated hanger for ease of washing and draining
- Raised edges aiding mortar retention
- Integrated carrying handle
- Adopted by the UK's largest main-contractors and sub-contractors as part of their environmental policy

Size:	2mm x 610mm x 610mm
Material:	Recycled Aluminium
Registered Design:	6274167
