Stainless Wall Starter

Our wall starter kits provide a fast, easy and economical way of joining new brickwork to old without cutting it.

They are suitable for both internal and external brick or block walls, from 60mm to 250mm wide and up to 3 storeys high.

The ties are adjustable to suit variable coursing.

Installation:

Each pack contains:

- 2no 1200mm x 40mm wall starter profiles
- 10no stainless adjustable twist lock ties
- 5no stainless washers
- 5no stainless M6 x 50mm hex head coach screws
- 5no nylon wall plugs
- 1no set of fixing instructions

These are all the fixings required for a single wall up to 2.4mtr in height and suits bricks or blocks between 60mm and 250mm thick.

Multiple packs can be joined together up to a maximum of 3 storeys or 8 metres.
