

Grayson Stainless Swift Box

The Grayson Stainless Swift Box offer safe and permanent nesting sites for swifts, creating a practical and unobtrusive addition to any building. The integrated concave nesting chamber provides an ideal foundation for nest building, helping to support and secure the future of swift populations.

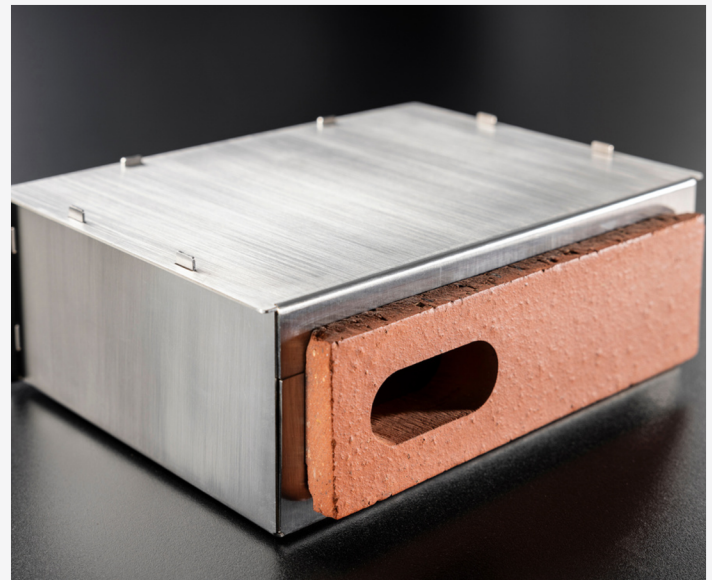

Product Information:

The Grayson Stainless Swift Box has been designed to replicate a standard brick, the coloured face of the Swift Brick itself blends in with the surrounding masonry. In addition, we are able to provide bespoke Swift boxes with the exact bricks from site, allowing for complete confidence and seamless installation. Engineered with an A1, non-combustible outer-shell, this swift box can be installed with an assurance that this product will stand the test of time.

Our Swift Box has been developed in collaboration with leading housebuilders and conservation specialists, and provides a safe, spacious, and durable nesting space that enables swifts to thrive within the solid construction of modern homes.

Applications:

The Grayson Stainless Swift Box should be installed high up within the gable wall of the property, ideally at a height of 5 metres or more, positioned above the insulation zone. Whenever possible, choose locations that receive minimal direct sunlight during the hottest parts of the day — ideal positions include beneath the verge overhang or bargeboard.
